

Motion: In order to **improve transportation efficiencies and continue to encourage GSR attendance at assemblies** for the Suffolk County General Service, I make a motion that:

We develop a committee to evaluate transportation options to SENY events.

Background:

A review of the expenses for the last three bus trips to Westchester County, indicated an expense of approximately \$2,250 per event. Ridership varied but included an average of 2 persons per trip, for an average expense of **\$1,125 per person**, for a 73-mile ride.

Opportunity:

Explore alternate transportation options, including carpool, van, taxi, personal auto with mileage reimbursement, etc. Compare options to existing bus transport. The committee would report back in June with the top two suggested recommendations, to be decided by a vote, for implementation on a trial basis for the November Assembly.
